Short-Term INTERNSHIP : TENCON INFRA

SAP-ABAP(Advanced Business Application Programming

TENCON INFRA Rajahmundry Andhra Pradesh India.
Advanced Business Application Programming (ABAP) is a high-level programming language created by SAP for developing business applications within the SAP environment. ABAP is primarily used to develop custom reports, interfaces, and extensions for SAP's enterprise resource planning (ERP) system. It allow for the manipulation of data in the SAP system, integration with other systems, and customization of standard SAP software to meet specific business needs. Key features of ABAP include its integration with the SAP database, extensive support for creating complex business logic and a robust development environment provided by SAP.
